

Reference #	7511603
Last Name *	Riggle
First Name *	William (Bill)
Contact Phone *	402-592-5292
eMail Address	<a href="mailto:rigglew@cox.net">rigglew@cox.net</a>
1st Choice	Director, Field Scheduling
2nd Choice	

3rd Choice

How many years (including 2014) have you participated as an NSS player and/or manager? *	8 years
--	---------

Have you previously held a position with the Nebraska Senior Softball Board of Directors? *	No
---	----

Office or Position Title	
--------------------------	--

Number of Years	
What talents/skills do you possess that will benefit Nebraska Senior Softball?	<p>Willing to offer suggestions in the best interest of the league. Willing to listen to others, striving for a "majority rules" approach. 2014: I was asked to join Greg West's committee researching the 'Backstop Draft' issue. While I was not an official member, I worked thru Duke Burgess offering ideas. 2005 member of the Survey Committee with Duke Burgess and others striving for league-wide consensus on a variety of rules topics. 2011 member of Dave Dye's Draft Advisory Committee. 2010: Worked with Duke Burgess creating an XCEL spreadsheet to aid the draft process. 2009? Rainy Spring season. I worked with Dave Banghart editing the schedule to include rainout makeup dates.</p>

Briefly state why you wish to hold an office/position on the NSS Board of Directors:	<p>As Scheduling Director, my job would be to integrate the desires of the major players into a workable schedule. Not my desires but yours. Culled thru surveys and questionnaires prior to the season. But I have to ask: 1) How many 3rd/4th place divisional teams missed out on a chance to climb their divisional ranks due to winnable games rained out? 2) Why no rainout dates within the schedule? You could include positional rounds every 3rd week that could be placeholders as rainout dates if needed. 3) Wouldn't Positional rounds add validity to divisional leaders that vie for championship playoffs? 4) Why a post-championship Spring tournament yet no Fall season playoff? If you're content with the current scheduling efforts, then I'd continue that process.</p>
